

## THREADED TACK FASTENER

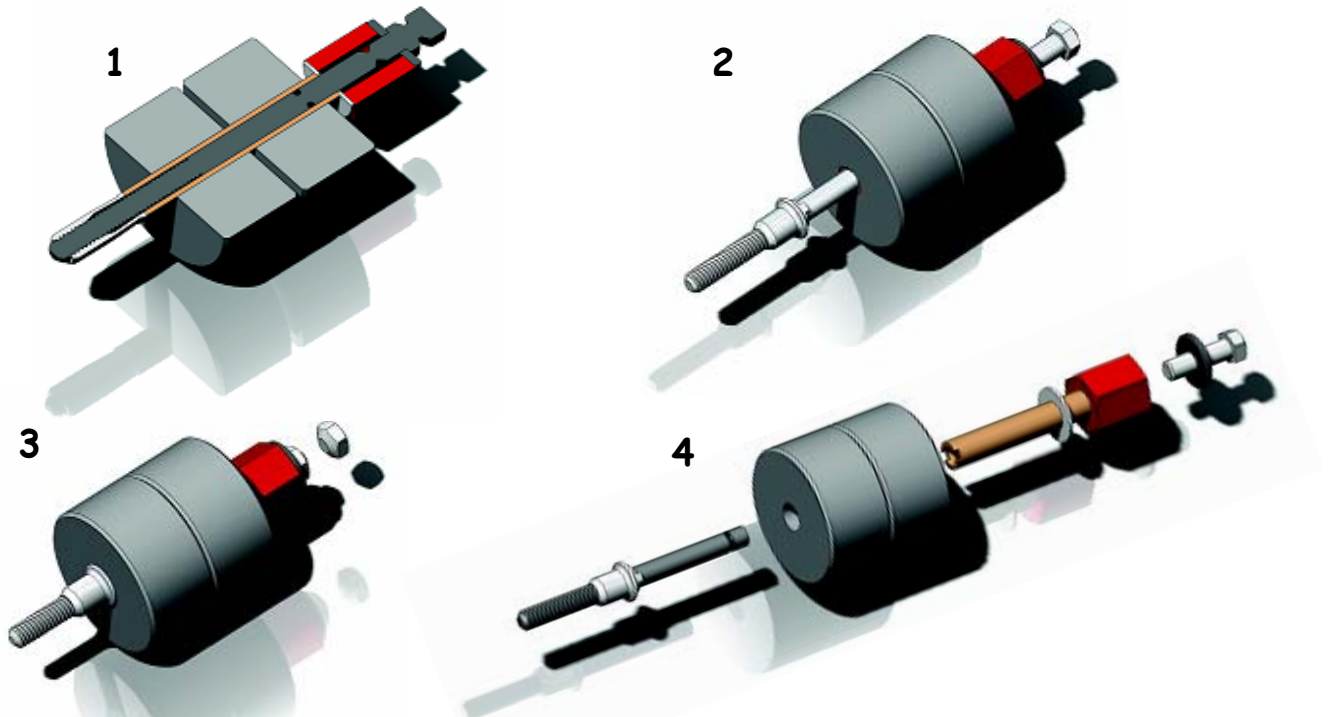

*Another fastening solution from  
MONOGRAM AEROSPACE FASTENERS*

## **DAD-BOLT™** DUAL ACTION DRIVE THREADED TACK FASTENER

### FEATURES

- Vise-like action develops high clamping force
- Easily installed and removed with a single tool
- Torque-type removal eliminates drill out reducing risk of damage to holes
- 360° contact at the exit hole edge avoids panel damage possible with wire type clamps
- Low profile avoids safety concerns and reduces traversing motion of robotic equipment
- Cylindrical shank avoids sealant clogging allowing use in autoclave cure applications
- Extended grip range – fewer parts to stock and simplifies robotic feeding

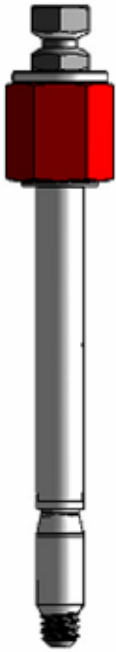

US Patents Applied For and Pending
